The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 13-19, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by the PG-Publication to Gaiser ('774).
- 3. Claims 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by the EP patent ('488).
- 4. Claims 13-16 and 21-24 are rejected under 35 U.S.C. 102(a) as being anticipated by the WO patent ('004).

For a description of how the instant claims are being rejected over the above references applicant's attention is directed to the PCT/210 form.

5. Claim 23 is rejected under 35 U.S.C. 102(e) as being anticipated by Hagg ('930).

Per claim 23, Hagg discloses a fill level measuring device working according to the travel-time principle. The device includes a sending and receiving element (18) for sending transmission signals and for receiving their echo signals, a first evaluation module (14) for executing a first evaluation method for determining fill level and a second evaluation module (20) for executing a second evaluation method for detecting an exceeding or falling beneath of at least one fixedly predetermined fill level.

6. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Farmer et al ('253).

Per claim 23, Farmer et al discloses a fill level measuring device working according to the travel-time principle. The device includes a sending and receiving element (20) for sending transmission signals and for receiving their echo signals, a first evaluation module (46) for executing a first evaluation method for determining fill level and a second evaluation module (48) for executing a second evaluation method for detecting an exceeding or falling beneath of at least one fixedly predetermined fill level.

Per claim 24, see Fig. 2.

Per claims 1 and 2, Farmer et al also discloses a method for measuring a fill level of a fill substance in a container and for monitoring at least one predetermined fill level (rim level). The method includes determining a fill level according to a first evaluation (46) and determining whether the fill level exceeds or falls beneath a predetermined fill level (rim) using a second, independent evaluation 48).

Art Unit: 3662

Dependent claims 3-22 are further anticipated by the steps disclosed throughout Farmer et al.

Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ian J. Lobo whose telephone number is (571) 272-6974. The examiner can normally be reached on Monday Friday, 6:30 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H. Tarcza can be reached on (571) 272-6979. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
